FOOD WEBS IN EELGRASS

Students at Pemetic School were looking at organisms on eelgrass in the microscope and taking pictures. This is one they found. Can you identify this organism? (Hint, when it's bigger, you will find it on rocks in the intertidal area of the shore!) Why do you think this organism is hanging out in eelgrass?

What are these organisms? _____

What do they eat? _____

What eats it? _____

What is a food web? _____

photo taken of an eelgrass blade under a microscope

Use the space below to draw a food web with organisms you saw under the microscope and at any eelgrass beds you may have visited. Use the organisms listed on the **KE sheet as a guide.**
