

Eelgrass Organism Poster

Each student will create a poster explaining an organism that lives in their eelgrass tank. Each poster needs to have the following details:

1. A hand drawn picture or photograph (taken by the student!) of the organism.
2. The common and scientific name of the organism.
3. Information about or a diagram of the *life cycle* of the organism (what does it look like when it hatches, what does it look like in its juvenile stage, what does it look like as an adult?)
4. Draw a *food web* of an eelgrass bed that includes your organism
5. Explain why eelgrass is important for your organism.

My Organism	
	Why eelgrass Is important For my guy
Scientific name	
Life Cycle:	Food Web:
